STUDENT REPORT

Department of Computer Science

Aalborg University

Title:

REIDS – Reducing Energy Imbalances with Demand-side Scheduling

Theme of project:

Intelligent or Massivelly Parallel Systems

Project period:

2nd September, 2015
to
20th December, 2015

Participants:

Jens Emil Gydesen (jgydes11@student.aau.dk)
Kasper Lind Sørensen (klsa11@student.aau.dk
Simon Binderup Støvring (sstavr11@student.aau.dk)

Advisor:

Brian Nielsen
(bnielsen@cs.aau.dk)

Ended:

20th December, 2015

Abstract:

Preface

Table of Contents

CHAPTER 1

Introduction

CHAPTER 2

Analysis & Design

CHAPTER 3

Implementation

CHAPTER 4

Evaluation

CHAPTER 5

Conclusion

Bibliography
